PROFESSIONAL SUMMARY

An Analytical and detail-oriented frontend Software Engineer with 7+ years of professional experience building responsive, high-performance web applications and dynamic WordPress sites. Specialized in React.js, JavaScript, TypeScript, Tailwind CSS, MUI, Chakra UI, and WordPress. Strong focus on UI/UX, component-based development, API integration, and performance optimization. Experienced in transforming ideas into scalable, user-centric interfaces using modern frontend frameworks and clean coding practices.

TECHNICAL SKILLS

- **Frontend Core Skills:** HTML5, CSS3, JavaScript (ES6+), TypeScript, Responsive Design, Cross-Browser Compatibility
- **Frameworks & Libraries:** React.js, Next.js, Redux, Context API, React Hooks, jQuery, AJAX
- **UI Frameworks & Styling:** Tailwind CSS, Material UI (MUI), Chakra UI, Ant Design, Bootstrap, SASS/SCSS, Styled Components
- **CMS & Web Platforms:** WordPress, Elementor, WooCommerce, SEO Basics, Theme Customization
- **APIs & Integrations:** REST APIs, JSON, Axios/Fetch, Postman, API Debugging, Authentication Flows

PROFESSIONAL EXPERIENCE

Software Engineer - AspireX LLC (Remote)

Feb 2025 – Present

- Developed responsive UIs using React.js, Chakra UI, MUI.
- Converted wireframes into pixel-perfect, production-ready components.
- Improved frontend performance through optimization and clean code practices.
- Integrated REST APIs and ensured smooth data handling.
- Enhanced accessibility and responsiveness across all breakpoints.

Software Engineer – Ili.digital ag (Remote)

Feb 2022 – Dec 2024

- Built scalable web apps using React.js, TypeScript, component-based architecture.
- Created reusable UI components to accelerate development.
- Integrated REST APIs for dynamic and interactive interfaces.
- Implemented UI with Tailwind, MUI, Chakra UI, Ant Design, SCSS.
- Improved application load speed by 50% via performance optimization.
- Enhanced UX, increasing user satisfaction by 20%.
- Managed CI/CD workflows using Bitbucket Pipelines.

Associate Web Developer – BetaStack

Oct 2019 – Feb 2022

- Developing frontend features using HTML, CSS, JavaScript, and early-stage React.
- Improved UI components and layout structures for responsive web design.
- Collaborated with senior developers to deliver clean, maintainable code.
- Supported API consumption and debugging tasks.

Junior Web Developer – Bazingo Inc

July 2019 – Oct 2019

- Gained practical experience in HTML/CSS and basic frontend development.
- Participated in creating static pages and enhancing UI consistency.
- Learned industry-standard coding practices and workflow processes.

EDUCATION

Bachelors of Computer Science

University of Management and Technology

Sept 2017 – Oct 2021

Intermediate, Punjab Group of Colleges

Aug 2015 – Aug 2017

KEY ACHIEVEMENTS

- Improved website load time by 50% through optimization and code restructuring.
- Increased user engagement and satisfaction by 20% with UI/UX refinements.
- Delivered reusable component libraries reducing development time by 30%.
- Successfully contributed to large-scale frontend systems for international clients.

PROJECTS

1. Project Name: StayX

A project aimed at enhancing employee training and engagement.

- **Description:**
- Developed responsive UI components, integrated APIs, and optimized the platform for smooth employee learning workflows.
- **Technologies Used:** React.js, Tailwind CSS, TypeScript, Material UI, REST APIs, Axios, Git, Bitbucket

2. Project Name: WindoXX

A project focused on monetizing unused spaces.

- **Description:**
- Built dynamic, responsive interfaces enabling users to list and monetize unused spaces with improved performance.
- **Technologies Used:** React.js, TypeScript, MUI, SCSS, REST APIs, Fetch, GitHub

3. Project Name: KnorrBremse

Sustainable system solutions for safer, reliable, and efficient mobility.

- **Description:**
- Delivered frontend modules for a large-scale mobility solution with a focus on safety, performance, and UI consistency.
- **Technologies Used:** React.js, SCSS, Chakra UI, API Integration, JSON, Bitbucket Pipelines

4. Project Name: Appointment Management System

- **Description:**
- Built a fully interactive appointment scheduling interface with dynamic UI components using React and jQuery.
- Added barcode scanning support and integrated automated email alerts tied to inventory actions.
- **Technologies Used:** Flask, MySQL, jQuery, React.js (UI upgrades), Barcode Scanning, Email Alerts

5. Project Name: Inventory Management System

- **Description:**
- Developed a user-friendly inventory management front-end with real-time updates and intuitive navigation.
- Implemented barcode scanning and automated low-stock email notifications.
- **Technologies Used:** React.js, SCSS, Chakra UI, API Integration, JSON, Bitbucket Pipelines

6. Project Name: Muse Tax – AI-Powered Tax Optimization Platform

- **Description:**
- Built the front-end interface for an AI-driven tax optimization platform offering personalized financial insights.
- Integrated real-time data via APIs from financial institutions, ensuring smooth interactive UX.
- **Technologies Used:** React.js, Django, OpenAI GPT API, AWS, OAuth Authentication, CI/CD Pipelines

7. Project Name: Privatize – B2B Wealth Management Platform

- **Description:**
- Developed a responsive and secure front-end for a B2B wealth-management platform, enabling portfolio access and private-market fund integrations.
- Focused on clean dashboards and a seamless user workflow.
- **Technologies Used:** React.js, Django REST API, AWS, PostgreSQL, Role-Based Authentication, CI/CD
